Table of Contents: Volume 25

Number 1

An Integrated Approach to Scheduling in Safety-Critical Embedded Control Systems . . . . . *I. Bate and A. Burns* 5

Dual-Priority versus Background Scheduling: A Path-Wise Comparison . . . . . *Bruno Gaujal, Nicolas Navet and Jorn Migge* 39

Response Time Driven Scheduling for Programmable Logic Controllers with Network-Based I/O Systems . . . . . *Seungkweon Jeong, Naehyuck Chang and Wook Hyun Kwon* 67

Integrated End-to-End Delay Analysis for Regulated ATM Networks . . . . . *Joseph Kee-Yin Ng, Shibin Song and Wei Zhao* 93

Numbers 2/3

Response Time Analysis of Asynchronous Real-Time Systems . . . . . *Guillem Bernat* 131

Multicycle Polling Scheduling Algorithms for FieldBus Networks . . . . . *S. Cavalieri, S. Monforte, A. Corsaro and G. Scapellato* 157

Priority-Driven Scheduling of Periodic Task Systems on Multiprocessors . . . . . *Joël Goossens, Shelby Funk and Sanjoy Baruah* 187

Burst Mode Bandwidth Allocation for Real-Time Messages in IEEE 802.12 Networks . . . . . *Taewoong Kim, Namyun Kim, Heonshik Shin and Naehyuck Chang* 207

Reactive and Real-Time Systems Course: How to Get the Most Out of it . . . . . *Tal Lev-Ami and Shmuel S. Tyszberowicz* 231

Compact Data Structures and State-Space Reduction for Model-Checking Real-Time Systems . . . . . *Kim G. Larsen, Fredrik Larsson, Paul Pettersson and Wang Yi* 255

The Valid Use of Utility in Adaptive Real-Time Systems . . . . . *D. Prasad, M. Atkins and A. Burns* 277
